

Mountain Weather Forecasting

Nov 17 & 18

Mount Washington Valley in NH
8 am – 5 pm daily

Guides • Skiers • Mountaineers • Hikers

Weather can make or break a trip into the mountains. Knowing how to properly analyze the weather and make your own forecast will give you an advantage when planning any trip. A more intimate understanding of weather maximizes your chances for success and increases your margin of safety.

Why You Need a Weather Forecasting Course

- Deepen your understanding of meteorology and learn how the atmosphere works.
- Learn to interpret weather maps, computer models and forecast products necessary to make their own forecast, prior to launching into the field.
- Acquire techniques for weather forecasting, assessing and tracking weather while in the mountains.
- Develop guidelines for thunderstorm forecasting and lightning safety.

Instructor: Jim Woodmency - Owner and chief meteorologist at mountainweather.com in Jackson, WY

- B.S. Meteorology
- Author of two books, Reading Weather and Weather in the Southwest.
- Mt. guide in the Tetons, Cascades & Alaska
- 14 years as a climbing ranger in the Tetons
- avalanche-weather forecaster for Alaska
- Forecaster and lead guide for High Mountain Heli-Skiing in Jackson.
- Forecasting weather since 1991 for expeditions, and SAR missions throughout the Western US, Alaska, Karakoram & Himalaya.
